

EVAN FALCONER

SLC, UT 84115 - LA, CA 90501 ♦ (310) 955-6759 ♦ evanfalconer4@gmail.com

EDUCATION

B.S. Mechanical Engineering

University of Utah

May 2027

Minor: Computer Science

GPA: 3.6

Coursework: *Mechanics of Materials, Manufacturing of Eng. Sys., Dynamic Sys. and Ctrl.s., Mechatronics, Heat Transfer*

SKILLS AND CERTIFICATES

Softwares: *SolidWorks, Siemens NX, Matlab, Simulink, Python, C#, ROS*

Skills: *Shop Tools, Wet Lab, Composite Manufacturing, 3D Printing, Mechanical Design*

Certificates: *SolidWorks CSWA, CSWA-AM, Composites Technician*

EXPERIENCE

Northrop Grumman

Clearfield, UT

Mechanical Engineering Intern

May 2026 - Present

- Attended on-site meetings at U.S. Air Force installations with government customers and contractors to coordinate technical requirements and project execution
- Created scientifically accurate, motion-based visualizations on complex systems in *Siemens NX*, enabling customers and employees to understand technical concepts more efficiently
- Resolved requirement and testing continuity issues by developing visual models of physical systems, enabling completion of SSS and advancement to the next development stage
- Analyzed project documentation and technical drawings to identify key metadata supporting engineering change management and risk assessment
- Developed a fully accurate 3D assembly, modeling and integrating 50+ custom and COTS components for company-wide engineering
- Researched and qualified replacement components for a critical system in accordance with military standards and specifications, developing a solution with a 50% reduction in price

Lacore Nutraceuticals

Van Alstyne, TX

Manufacturing Engineer Intern

June - August 2025

- Performed time analyses of manufacturing processes to support ROI calculations
- Generated maintenance plans and implemented improved preventative maintenance scheduling to increase equipment reliability and delay purchasing of new equipment
- Designed and prototyped custom parts for manufacturing machines in respect to space, material, design, and sanitation constraints
- Provided troubleshooting for autonomous personalized supplement systems, reducing downtime by 95% and repair cost by 40%
- Created capsule cleaning mechanism to retain surface cleanliness and improve air quality by 80%

HRE Lab (Human Robot Empowerment Lab)

Salt Lake City, UT

Undergraduate Researcher

March 2024 - May 2026

- Created and refined an adaptable sEMG system for high-DOF control to enhance abilities of paraplegic patients through “myogames” and assistive devices
- Upgraded robotic stand utilizing Arduino, ROS, and circuit design, to add 1 DOF external control, integrate with lab system, and increase monetary value by 300%
- Co-authored a conference paper accepted to ICORR 2025 “*An Extensible Platform for Measurement and Modification of Muscle Engagement During Upper-Limb Robot Facilitated Rehabilitation*”

3D4E (3D Printing for Everyone)

Salt Lake City, UT

School Club (Technical Lead)

March 2024 - Present

- Co-founded and launched 3D printing club at University of Utah leading to expansion of resources and ease of access to industry skills for undergraduate students across the University of Utah
- Organized and taught interactive CAD workshops resulting in 20% member retention and improvement of club expertise
- Led and managed project teams of students in accordance with design reviews and project deadlines

PERSONAL PROJECTS

3D Printed Drone for 3D Printing Club

April 2025

- Prototyped multiple iterations of the drone body to comply with weight, material, and strength constraints
- Experimented with multiple models of 6” quadcopter body to optimize strength-to-weight ratio
- Sourced parts from different vendors to reduce price by 40%
